

# FINAL CHOICE FOR BATTERY

### Adopt High-Class Imported Lithium Cells

More than decade since the establishment, Dynacore has been one of the leading brands in the professional broadcast field. The first reason is the high quality Lithium cells adopted. The cells have very little difference to each other, which ensures the high performance of the whole battery pack. When in storage, the self-discharging rate is very little, which extends the battery life effectively.

### Excellent production craft

We pay much attention to details inside the battery pack, by using the unique designed nickel slice to solder the cells, minimize the voltage drop, dissipate heating, and enhance the assembly intensity. Cells are arranged as triangular structure in the battery pack, stable and anti-shock.

### Multiple Safety Protection Design

Built-in intelligent IC circuit control, will cut off power when over-voltage, short-voltage, over-current, short circuit, over-charging, over-discharging, and non-equilibrium in unconventional situation.

Moreover, the battery housing is made from the high-impact ABS, with waist design and non-slip tread for secure handling.

### Strict quality control

All Dynacore batteries are CE and RoHS approved. Strictly test the battery cells before assembling into battery pack, it will increase the internal compatibility and prolong the battery life.

### Global Customer Support

With a skilled and experienced customer support team, Dynacore can solve your problems by phone, if a product issue cannot be resolved over the phone, it can be sent to us for repairment. Dynacore offers 3 years' warranty on batteries and chargers, 1 year swap-out warranty and another 2 years repairing warranty.

**Multiple-Choice For Different Cameras**

Dynacore batteries cover a wide range of cameras, we supply V-Mount, Gold Mount and various DV camcorder batteries. 10 different capacities ranging from 95Wh to 310Wh for V-Mount, Gold Mount batteries. Multiple DV camera compatibility, such as Sony, Panasonic, JVC, Canon.

**DC Output Function**

Most of Dynacore ENG batteries provide DC output socket, for powering other on-camera accessories simultaneously, such as the camera light.

**14.4V D-tap DC Output Socket**

**5V 1A USB Output Socket**

**7.2V Pole DC Output Socket**

**LED power indicator**

LED power status indicator shows accurately the remaining battery capacity.

**Power Indicator On Brick Battery**

**Power Indicator On DV Battery**
